

LEGEND 1140

CENTRE CONSOLE

Proven catamaran Hull design
Symmetrical bow section ensures directional stability
High Tunnel with asymmetrical sponson for inward banking in turns and soft ride

FULL CABIN

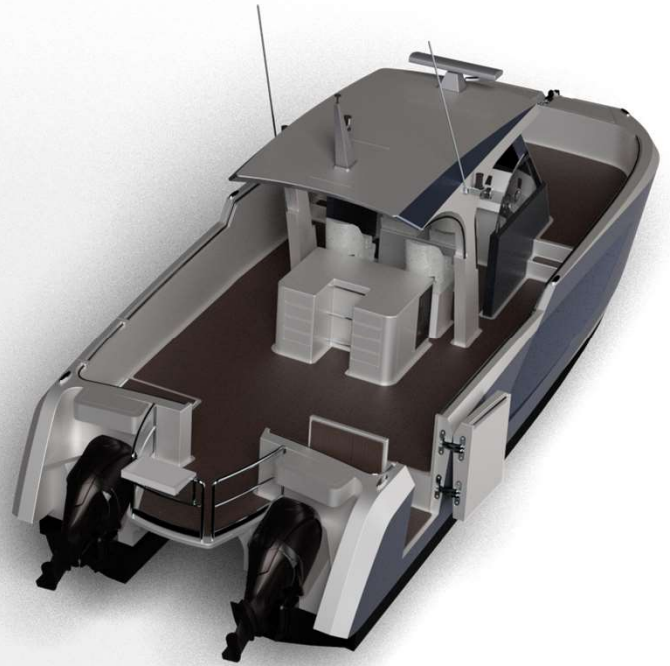

LEGEND 1140

PRINCIPLE CHARACTERISTICS

- Hull Type Catamaran
 Hydro Supportive Foil (option)
- Length (OL) 12.0 m
- Length (hull) 11.4 m
- Beam (moulded) 3.3 m
- Draft 0.55 m
- Range 250 nmiles
- Engines 2 x Outboards (petrol or diesel)
- Rating 250 hp (recommended)
- Construction Marine Grade Aluminium

OUR STORY

LEGEND Power Catamarans are designed and developed by a team that are well respected in the power catamaran arena. The hull shape has evolved since the late 1980's when Prof Bob van Niekerk and Nic de Waal were instrumental in the design of the power catamarans of T-Craft, the company owned by Peter Tinker. Now Peter with Andre van Niekerk who co-founded Veecraft Marine have come together once more to launch this new range of foil-assisted power catamarans.
